About Us

Open Range Communications is a broadband wireless Internet services provider whose primary focus is delivering simply easierSM wireless high-speed Internet and voice services to hundreds of un-served and underserved communities across America.

The Company announced on January 9, 2009 an investment of \$100 million from One Equity Partners (OEP), the private equity arm of JPMorgan Chase & Co. In March, 2008, the United States Department of Agriculture's Rural Development Utilities Program (RDUP) approved a \$267 million Broadband Access Loan for Open Range, with the prerequisite that private financing also be secured. The OEP investment satisfied the RDUP's loan terms, making the funds available to Open Range.

What We Are Building

Within the next five years, Open Range intends to serve over 500 communities, making its services available to approximately six million people. Open Range's wireless broadband network solution will connect customers through licensed spectrum, enabling communities to improve safety, economic growth education, and quality of life to remain competitive in the age of global communications.

Our Solutions Will Be:

- Instantly Available – Buy it, connect to your computer, access the Internet. No installation or configuration necessary.
- Portable & Dependable – Always on, always connected in our service area.
- Highly Secure – Provided on licensed spectrum.

Services We Will Offer

Open Range will deliver affordably priced voice and Internet services and access to world-class communications for all Americans.

Our Services Will Include:

- Broadband Internet – In addition to portability anywhere in our coverage area, we offer high speed Internet service for less than \$40 per month.
- Voice – Less than \$30 per month, including unlimited nationwide calling.

How Open Range Communities and Customers Will Benefit

Open Range will build a 17-state 4G wireless broadband network providing wireless broadband to un-served and underserved American communities that is simply easier. The 500+ planned communities will have the tools needed to compete in today's global marketplace.

Our Benefits Will Include:

- Greater economic development and employment opportunities. Enhanced public safety and "first responder" support.
- Dramatically improved vital services for citizens including community outreach and support, local sponsorships, as well as enhanced healthcare, education and government operations.
- Environmental benefits – Our network build will not mar the landscape and citizens will appreciate the long-term 'green' benefits (i.e., reduced auto emissions due to less commuting).
